INTRODUCTION

MS Agarbatti began its journey of growth in the year 2013 by manufacturing and trading a wide range of Agarbatti. We give a quality range of Loose Agarbatti, Scented Agarbatti and Perfumed Agarbatti. Our company has earned the confidence of all its customers and gained a striking position in the market for high-quality manufacturing of these products and this has also assisted us in maintaining a long-term relationship with our clients. Apart from this, we have quality testing units to check and maintain the quality of our products. Our products are created keeping in mind the technical standards so that they can meet the anticipations of the client.

INFRASTRUCTURE

At MS Agarbatti, we have been sustained by an ultra-modern infrastructure since the commencement of our company. Developed over a broad area of land, our infrastructure is thoughtfully segregated into individual units such as manufacturing, in-house quality testing, warehousing, and sales & marketing units. Our infrastructure is valued among our patrons for its high production capacity. In addition to this, it is well-equipped with the modern equipment required for carrying out standardized operations.

QUALITY ASSURANCE

Quality being the main focus of our company and to maintain this we have implemented quality testing units. Our offered products are inspected and checked on various parameters at different levels of product development. We have a skilled quality controller with an adamant approach towards quality while inspecting these products. Furthermore, we provide training to controllers on a regular basis for enhancement of their skills and to keep pace with the latest quality norms.

OUR TEAM

Backed and supported by a team of quality controllers, procurement agents, warehousing experts, administration personnel, skilled & semi-skilled professionals, production managers, sales & marketing executives and other supporting staff, we work to attain maximum client satisfaction. They are appointed by our mentor after assessing their skills, knowledge, and experience on pre-defined selection parameters.
